

This device was located on 12/23/10:

A fraudulent credit/debit skimming device was located on a drive through ATM machine at the True West Credit Union located at 2990 N. Dobson Rd. Chandler, AZ. After finishing a transaction, the reporting person went to retrieve their card and the device fell off of the machine. The skimming device had been placed over the ATM card reader and held in place by double sided tape. Responding officers checked the surrounding area for potential suspects prior to contacting the reporting person but came up empty handed. There were two functioning drive up ATMs at this location and the suspects had placed a traffic cone in front of the second drive through forcing customers to use the machine with the skimming device.
